

Camera Housing K/MT 213

Our pressure-proof titanium camera housings are equipped with a camera window at the front and one or more connectors at the rear side.

You can choose between a plain window or a cone shaped one made from borosilicate glass, perspex or sapphire with an opening angle of $2 \times 44^\circ$. This is particularly suitable for macro images.

We offer complete technical systems, e. g.:

- Digital Camcorder
- Micro Colour Camera with PAL/NTSC output
- Internal electronics
- Voltage supply
- Digital Recorder
- Programmation software

We develop, design and manufacture customized camera housings with or without accessories in different dimensions.

The internal mounting as well as the choice of the connector(s) are adaptable according to the client`s special requirements.

Example for a standard camera housing

Size:	Inner diameter: 130mm Length: 500mm
