

PluK

Smart details: Deep-sea connector PluK

Robust and reliable – that´s what a deep-sea connector must be.

Although – not too big would be nice and good handling.
Flexible number of pins (maybe 20-30 pins?) and digital use would be good, BNC und Ethernet.
Fibre optics? Sure! Why not – if it doesn´t cost too much.

„There is no such thing!“, was the answer to our long lasting search.

Now it is available – here it is: PluK, the perfect deep-sea connector!

This is PluK:

Made from titanium

30mm diameter

Up to 30 pins

High Power, Ethernet, USB,

Fibre Optics, Hybrid ...

Compatible to external storage device „StiK“

12 km water depth

Double-o-ring-sealing

And the price? – Not too expensive!
