

# Titanium Pressure Tubes

By reason of our experiences with the material titanium we have become an internationally renowned partner in deep-sea research.

In particular our titanium pressure housings, made from semi-finished goods and pressure-proof to 600bar with 1,5 safety, convince with their excellent quality at a reasonable price.

We test each tube at full pressure in our pressure tank before delivery and accompany it with a certificate.

Dependent on their use our titanium pressure tubes are equipped with / without caps, connectors or plugs, threads, camera windows, grips and so on...

**Titanium is unique: by 44% lighter than steel and corrosion resistant!**

**We manufacture titanium pressure housings in every dimension, please ask us!**

The images show examples with inner diameters from 25 to 335mm and lengths from 100 to 1000mm.
